Orcières

MERLETTE 1850

100 % NATURE
Destination

ORCIÈRES

the **DNA** of an Alpine resort with a *Mediterranean spirit*

Orcières, located halfway between Marseille et Grenoble (2 hrs and 30 mins in both directions), has the sun and the warmth of the people of the South as well as the wilderness and preserved Alpes. Nestled at an altitude of 1850m, in the heart of the Écrins National Park, this family-friendly resort offers a wild and unspoiled scenery, surrounded by the most beautiful peaks of the Écrins massif: Vieux Chaillol, Pointe des Estaris, Grand Pinier, and Tête de Dormillouse. Its varied landscapes between larch forests, steep granite faces, beautiful snowy slopes, and vast high-altitude plateaus, provide

many playgrounds to explore for amazing nature experiences: dog sledding, cross-country skiing, snowshoeing, Nordic skiing, ice falls, etc. With its skiable terrain peaking at over 2725m in altitude and 100km of slopes, it is the largest resort of the Hautes-Alpes. As a paradise for families, a base camp for sports enthusiasts, a haven for adventurers, and a pantry for gourmets, Orcières promises an unforgettable stay for families in a natural setting.

THE TOP 3 Highlights OF THIS WINTER

SANTA CLAUS COMES TO ORCIÈRES

In his big red coat, he arrives in Orcières at the children's home... Whether they were well behaved or did as they pleased, all of our kids deserve the greatest gift of all for Christmas. It's the perfect opportunity to have the favorite long-white-bearded grandpa at your home to distribute

presents the morning of December 25th! He's got everything planned for his grand tour: he knocks at the door of all the little children who are filled with wonder... There's no doubt about it: surprise and magic are in store! To experience this dream come true, you must register with the Tourist Office.

i € 20 / family **INFORMATION AND RESERVATION VIA :** <https://reservation.orcieres.com/>

SKIING FOR BEGINNERS IS FREE!

Skiing for the first time or getting back on the slopes after many years, it can be a big deal... Especially when you are surrounded by skiers rushing down the slopes at full speed. For a gentle start or return to learning free of apprehension, the ESF instructors at Orcières offer apprentice skiers the opportunity to discover the joys of skiing on a green slope reserved entirely for them. And for this occasion, it's all free: access to the ski lift, equipment, and supervision! No more excuses this winter, we're putting on the skis (again)!

NEW "BAR À FONDUES" AT ORCIÈRES: A JOURNEY OF AUTHENTIC TASTE

The resort adds a new gourmet address with the opening of "Bar à Fondues", a one-of-a-kind restaurant. Led by a mountain enthusiast and former athlete specializing in triathlon and triathlons. He fell in love with Orcières during altitude training courses to boost his performance and decided to settle here permanently. The restaurant offers a wide range of classic and innovative fondues, as well as aperitif platters, Champsaurs plates, Orsat bruschettas, meats, tourtons, and local cheeses from the

valley. Open all year round, the "Bar à Fondues" will also welcome hikers between seasons for a hearty breakfast or a take-away lunch, all in a warm atmosphere with its barrel tables. A challenge brilliantly met by its brilliant owner!

i **Reservation :** + 33 (0)4 92 53 56 10, reservation of hiker's breakfasts and lunches the day before.

ORCIÈRES, writes a new page in its story...

Since 1962, Orcières has cultivated its own identity. An identity that is innovative, attractive and constantly evolving. Its dynamism earned it a pioneering role in many fields such as the creation of France's first Jardin des Neiges (1967), the launch of the Cartable à la Neige program

(1970), the construction of a Palais des Sports et des Loisirs from 1986, the inauguration of France's first Télémix in 2003, the commissioning of Europe's largest zip line in 2009, a new concert hall, and the creation of Espace Écrins in 2017...

The resort is constantly innovating to offer excellent skiing and leisure facilities, family-friendly and out-of-the-ordinary activities, and a 5-star welcome in both winter and summer!

... in the resort

Modernization of the Palais des Sports

The Palais des Sports of Orcières Merlette 1850 is transforming and modernizing. Its in-depth renovation is designed to support the resort's diversification in tourism (in particular, offering sports courses), attract a new clientele, expanding the scope of the seasons, positioning the Palais des Sports as a differentiating feature of the resort while at the same time responding to the current climactic and economic challenges (the reduction of the building's carbon

footprint and the use of local materials). This huge facility will welcome visitors with new sports and recreational areas that meet the expectations of today's customers. Access to some of the facilities will be guaranteed during the renovations (spring 2025-2027).

Reinforcement of our 'Qualité Confort Hébergement' accreditation

Created in 2018 in Orcières, this accreditation is intended to help and support its rental property owners to better evaluate and show vacationers the value of their accommodations. It offers a reference system for rating lodgings from 1 to 5 'griffes' (like the star system) and 196 lodgings are now accredited. This quality approach echoes the new 'Meublé de tourisme' classification system, a significant part of which includes environmental criteria. These include, for example, measures to

reduce energy consumption, water consumption, the existence of a waste sorting system, raising customers' awareness of eco-actions, the installation of charging stations for electric vehicles, a compost bin, the provision of at least two environmentally-friendly cleaning products and eco-friendly bathroom products.

... in the ski area

A fleet of top-quality ski lifts

New this winter, an open-air carpet replaces the 'Lutins' ski-tow on the Queyrelet snow front, for a more gentle transition to skiing.

This new feature is part of a global initiative to optimize the different ski lifts of the ski area and to restore the resort's snow fronts to create a learning environment for those new to skiing.

In 2023, major work was carried out to improve the ski area. This work will continue in 2024 with the installation of new signage throughout the ski area (to find your way around without a map of the slopes), the renovation of the cabins at the start and finish of the ski lifts using a harmonious mix of materials (wood and stone), new furniture on the

panoramic terraces (wooden animals for young children to climb on, sun loungers for those who want to relax, and panoramic maps showing the surrounding peaks).

To capture your best poses and tan lines on the chairlift, a camera has been set up just a few meters from the arrival point of one of the resort's lifts. At the top, a screen displays your photo and you can enter your e-mail address to receive it instantly.

i Free, arrival at chairlift des Estaris.

The Rocherousse plateau is becoming a real "sliding" area.

This high-altitude plateau has become a must-see spot to spend long hours having fun. This open-air area brings together groups for different sliding activities: boardercross for thrill-seekers, cross-country ski trails for those who prefer a gentler pace, and snowshoeing or cross-country skiing for those who prefer to contemplate nature's beauty. Families have everything they need to spend

a whole day at the summit, from dog-sled rides to a gourmet break around a brasero plancha (a flat-top grill) at Rocherousse's high-altitude restaurant and a vitamin packed afternoon at the winterparc. Whether you're with family, friends, or your partner, Rocherousse is the place to be for an active and fun vacation.

An assertive ski position

The Camile Ricou downhill track, named after the former mayor of Orcières' and founder of the resort, hosts top-level international competitions in the speed disciplines (downhill and Super G) as well as technical events (slalom), thanks to its FIS approval. The track is a fast and technical course with numerous changes in terrain, making the champions of these competitions very proud, like Valentin Giraud-Moine and Alizée Baron, not to mention an exceptional skier: Michaela Shiffrin, who came here to train between two sequences

during the 2023 World Championships. Orcières regularly organizes European Cups, which are commended and acknowledged by the international staff and athletes for the quality of their preparation, supervision, trails, and grooming of the slopes. This slope is also a base camp for training the champions of the French national ski team and preparing athletes for the Winter Olympics in 2030.

... focusing on the "Green" trend

A 0-waste charter for a cleaner mountain

Orcières is aware of the necessity of preserving the surrounding environment, composed of fragile aquatic ecosystems and a significant biodiversity. In signing the, 'Montagne zéro déchet sauvage' charter, the resort is sending a powerful message in pledging to considerably reduce its waste production by 2030. This charter **(in the writing) will be signed** by five key parties in the resort: the Office of Tourism, the

Town Hall, the ski area, the ESF, and the shopkeepers' association. Starting this winter, these parties will be implementing a number of sustainable development initiatives such as continuing the paperless approach, reducing individual packaging in high altitude food service sites and at the ESF (particularly for children's snacks at the 'Jardin des Neiges'), and installing garbage cans in ski areas and communal ashtrays.

The Paris to Gap sleeper train for a car-free vacation

Leave your car in the garage and make the most of your vacation with a light spirit - that's what the sleeper train offers. Every evening at 9pm, a train departs from Paris to bring the fans of the mountains directly to the slopes the next morning (45-minute shuttle from the Gap train station to the resort, seven

departures on Saturdays). The return journey takes place in the same way on Sunday evening. In addition to offering you a peaceful experience, this mode of transportation is part of a slow tourism approach, generating up to 30 times fewer greenhouse gas emissions than a car.

i starting at €38 / person for a round-trip train ticket Paris-Gap, booking in advance. Add €2.10 / bus journey

Sustainable management of the ski area

The artificial snow network covering 60% of the ski area consumes little energy, thanks to a gravity-powered circuit that allows us to reduce energy production - in contrast with systems that pump and cool - the main natural water source coming from the Lac des Estaris at an altitude of 2,600 m. Everything is done in accordance with the recommendations of the Ecrins National Park. Here, the artificial snow is simply water transformed into snow crystals when exposed to low temperatures. The water drawn from the lake goes back to its source at the end of the season when the snow melts.

This winter, three snow groomers will be equipped with a snow height measurement system designed to provide precise information (to the nearest centimeter) on the depth of snow beneath the grooming machines that browse the slopes at night. The aim is to optimize the use of water resources - to produce the right amount of snow in the right place. The system will also be accompanied by an electricity management tool.

A region on the move towards a "green" attitude

Orcières is currently carrying out a number of renewable energy projects. In particular, the installation of a turbine in the pipes of the artificial snow network is being studied, with the aim of producing energy via hydroelectricity. The installation of a communal heating network to supply to several condominiums or public buildings will make it possible to dismantle oil and gas fired

heating systems. In order to reduce the energy loss of the resort's collective buildings, many infrastructures have been built using ecological materials (wood, cellulose wadding, pellet heating systems, etc.). The program for the renovation of the exterior of the buildings (larch wood cladding), which began in 2014, is systematically accompanied by prior thermal insulation.

The 'Qualité Tourisme' brand becomes the 'Destination d'Excellence' label

This label is the only 'state-guaranteed' official trademark awarded to tourism professionals for their hospitality and service quality. Around the historic pillar of 'Qualité', new criteria have been added to expand the brand, henceforth including a level of requirement in terms of 'eco-responsibility': these criteria fall under the categories of sustainable

mobility, digital and energy sobriety, water consumption, and waste management. Orcières' Tourist Office, holder of the 'Qualité Tourisme' brand since 2016, remains committed to this approach in order to adapt to the ever-changing tourism industry.

MICRO RESORT, MAXI PLEASURE: SLALOMING THROUGH THE LARCHES AT SERRE-EYRAUD

An intimate atmosphere, a small village of 20 inhabitants overlooked by an authentic resort, some 600 meters of vertical drop, a panoramic view of the Champsaur and a unique playground for freeride enthusiasts... Welcome to Serre-Eyraud! Located a few kilometers from Orcières Merlette 1850, this small resort is nothing like your typical ski terrain. Here, you pick up your ski pass at the village bar-restaurant, the number of ski lifts is counted on one

hand, and the off-piste area is unique. The 10 km of slopes, two green, three blue, three red, and two black, are a delight to ski, but more importantly, they allow you to slalom between the larch trees in the heart of a playground that could well be described as a ski paradise. When you choose to ski at Serra-Eyraud, you're opting for authenticity, unspoiled nature, and dream conditions offered by the resort's optimal north-east orientation.
